

A Quantum Leap in Imaging Performance

Premium, Comprehensive and Flexible

- High Resolution Imaging for Your Clinical Needs
- Advanced Imaging Technologies
- Extreme Maneuverability in a Compact Design
- Extensive Portfolio of Innovative Transducers

Advance Your Imaging Performance

High Resolution Imaging

- Premium performance with efficiency and speed
- High resolution 19" monitor
- Excellent Color Doppler with superb spatial resolution and sensitivity

Advanced Imaging Technologies

- Motion Compensated Angular Compound Imaging (MACI) ensures high quality real-time images using camera imaging technology
- Automatic Mode Adjustment (AMA) optimizes high resolution B-Mode imaging when you change modes and depth
- Triplex enables you to maximize PRF with a tight spectral envelope and real-time synchronicity between 2D and Color Doppler

Extremely Maneuverable and Easy to Use

Small footprint – fits in the tightest spaces

- Four hours plug-free imaging
- Innovative, intuitive user interface
- Smooth, sealed keyboard for easy cleaning and disinfection
- Wi-Fi network connection allows a more flexible workflow with wireless printing and archiving possibilities

State-of-the-Art Transducers for Your Clinical Needs

- Innovative design for access to all areas
- Advanced puncture guides
- Convenient one-button control
- Easy sterilization and disinfection

General Imaging

Exceptional image quality, intuitive user interface and advanced workflow features enable high quality abdominal, small part and vascular imaging. Unique Vector Flow Imaging mode enables angle-independent visualization of blood flow.

Surgery

The gold standard in surgical ultrasound. Precise visualization. Sharp laparoscopic, intraoperative and percutaneous images. Comprehensive range of dedicated surgical and neurosurgical transducers. Simple to clean.

Robotic-Assisted Surgery

Premium performance robotic ultrasound solution. Wireless remote control and dedicated transducers for uncompromised image quality and control. Unique 3D visualization.

Urology

Excellent detail and contrast resolution for kidney imaging. Superb spatial resolution and sensitivity in Color Doppler. Comprehensive range of transducers for prostate biopsy and treatment guidance.

Walk Up and Use

Full-featured system is exceptionally intuitive. Easy setups – walk up and use. Innovative touch screen and simple touch pad.

Real Clinical Impact with High Resolution Imaging

30 wk Circle of Willis

Cholelithiasis Using 4.3 MHz Tissue Harmonic Imaging

Normal Renal Vasculature

Femoral Vein PW Doppler

Carotid Bulb Plaque

Multiple Thyroid Cysts

Femoral Artery and Vein with Color Doppler

Internal Carotid with PW Doppler

VFI [Vector Flow Imaging] of CCA and IJV

Brain Tumor Using the Intraoperative Neurosurgical Transducer

Spinal Tumor Using the Intraoperative Neurosurgical Transducer

Right Lobe of Liver in Sagittal Plane

Transverse prostate with Power Doppler Imaging

Renal Arcuate Artery with PW Doppler

Testicular Artery with PW Doppler

Normal Testis and Epididymus

Acoustic and Clinical Innovators for Over 30 Years

Recognized as a global leader in the development of ultrasound systems designed for surgery, urology and anesthesia, BK Ultrasound offers a versatile range of state-of-the-art imaging systems, technologies and dedicated transducers to help enhance diagnostic confidence and advance the care of patients.
