

More Flexibility for bkFusion

bkFusion provides an efficient and familiar biopsy workflow, allowing urologists to maintain control of the procedure and freely make adjustments to better target areas of concern. bkFusion now offers **additional flexibility** to best meet your practice's MRI contouring needs.

Pay-Per-Use MRI Contouring

BK Medical has partnered with DocPanel to enable MRI contouring on a **pay-per-use** basis for your bkFusion prostate biopsies, giving you:

Access to **on-demand MRI contouring** for fusion prostate biopsies without a radiology department affiliation or a radiology software suite

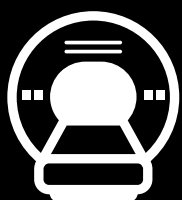

A convenient, **cost-effective** option for MRI contouring

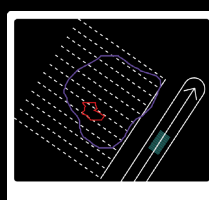

Support to begin your MRI/US fusion biopsies **in as little as 24 hours**

MRI

**MRI Contouring by
DocPanel**

Fusion Biopsy

How does it work?

- DocPanel allows urologists to access fellowship-trained radiologists for MRI contouring, **on demand** and with **consistent** results.
- Urologists can work with the **same specialists** on all cases.
- Urologists can easily **customize the solution** to their clinic's needs by choosing from various options for data upload and file transfer.

Get started with five simple steps:

1. Create a **DocPanel account** [here](#)
No upfront cost to create your account and get started
2. **Configure your preferences**
Select your read types, modality, and specialty area
3. **Select your radiologist panel**
DocPanel matches you with the right team of experts
4. **Choose your data transfer method**
Different options are available based on your case volume and clinic needs
5. **Send your on-demand cases to the experts for contouring!**
