Technical Writer

Join us in the creative challenge of creating instructions to help our customers get the full potential of BK solutions.

Technical Writer for Marcom

We are looking for an additional Technical writer to join our Technical Documentation team in BK Medical Marcom. This position is part of the team who ensures the creation of safe and high-quality Instructions for Use to our global customers in the required language.

Together with your colleagues in Tech Docs you will author and update Instructions for Use for our national and global key stakeholders. You will work closely with R&D, Customer Service, Regulatory Affairs, and Sales. You will also play a pivotal role in the development of workflows and processes in Tech Docs. This role is in marketing not Regulatory affairs or Quality.

You:

- You are passionate about creating and developing good user content
- Outgoing, proactive, assertive and decisive when working with our different key stakeholders and your daily planning
- Have 3-5 years work experience preferably within Life Science
- Ability to actively research, gather, evaluate information and understand the needs of the customer
- Fluent English oral and written
- Ability to speak and understand Danish
- Preferably an experienced user of FrameMaker
- Experienced user of MS Office programs

BK Medical is committed to designing ultrasound systems that help surgeons image, guide, intervene, and navigate inside the human body. Surgeons are our customers, and they range from HPB surgeons, neurosurgeons, and robotic assisted surgeons to urologists, colorectal surgeons, and more.

Our key values:

- We work with great passion and always strive to get to the next level
- We do what we say and say what we do
- We are open, direct and look out for each other
- We are aware of the basic needs and requirements of our customers. At the same time, we see opportunities instead of limitations

At our European headquarters in Herlev the work atmosphere is casual, and our organizational structure is flat. We have a good staff canteen focusing on health and variety, we have private health insurance and pension plans as well as social joint events and several staff clubs.

Technical Documentation

Pia B. Andersen
Senior Manager Technical Documentation
☎ +45 4452 8221

Technical Documentation is part of a global organization based in the European Headquarters in Herlev, Denmark. The Tech Doc team consists of 4 people.

We are responsible for the creation and update of all instructions for use including localization into 24+ languages.

We are developing our methods for writing documentation to meet and optimize the end-user experience.

We work closely with our national and global key stakeholders in R&D, RA, QA, Customer Service and Clinical Marketing to deliver high quality labelling which allows customers to safely use our equipment.

Innovative Products

We are looking for employees who are as driven and motivated as we are. Employees who are passionate about developing products that can help doctors make decisions to improve the patients' quality of life

The Robotic Drop-In ultrasound transducer is used during surgical procedures to visualize organs. It is inserted through a trocar in the abdomen and can be controlled by a robot. The ultrasound images help the surgeon in decision making during surgery.

Our products are designed for ultrasound examinations in:

- Surgery
- Urology
- Pelvic Floor
- Colorectal

The bkSpecto is one of our recent developments. This unique scanner has very high image quality as well as an easy-to-use glass interface

BK Medical

Intraoperative Ultrasound

BK Medical is committed to designing ultrasound systems that help surgeons image, guide, intervene, and navigate inside the human body. Surgeons are our customers, and they range from HPB surgeons, neurosurgeons, and robotic-assisted surgeons to urologists, colorectal surgeons, and more.

Our mission at BK is to enable real-time intraoperative guidance during surgical procedures, giving surgeons the information needed to immediately make critical decisions. Our products are designed and customized for surgical procedures, to help surgeons save time and get results.

As market leaders, we work closely with experts and universities to provide the best solutions to clinical challenges.

Research and Development

BK Medical has development departments in Denmark and the US. The largest development team is based in Denmark. We develop software, hardware, mechanics, signal processing, and advanced algorithms.

When it comes to research, we have collaborated with the Technical University of Denmark (DTU) for more than 20 years. Together, we have completed 2 high technology projects for advanced ultrasound imaging. We are currently part of a large-scale project with DTU, Danish hospital Rigshospitalet, and the University of Copenhagen concerning extreme high-resolution ultrasound.

Global Organization

BK Medical is an international company with sales offices all over the world, and European headquarters in Herlev, Copenhagen.

At BK Medical, we support employees in developing their skills and expertise. We have a professional and informal organization with flexible working conditions and a flat organizational structure.

We are effective and can execute our ideas into strong products – these ingredients make BK Medical an exciting and development-oriented workplace.

We look forward to welcoming you to a team that makes a difference – a difference to quality of life.
