Student Worker

*We are looking for a Student worker to
help our Marketing department.....*

Student Worker

Our Marketing Department at BK Medical is very busy now - therefore we are looking for a student worker to help us. The job will be max. 8 hours per week at our office in Herlev.

Our new student worker will be expected to assist us with tasks like:

- Track KOL/reference contract's expiry day etc.
- Assistance with training records of BK sales and clinical employees globally
- Quarterly reports/statistics of end-user webinars
- Quarterly reports/statistics of internal training
- Other administrative tasks We prefer if you can come 2 x 4 hours per week within our normal working hours (9-17) but are willing to discuss that.

Your profile:

- You have a high-school degree and maybe you have just started your BA studies
- You are dutiful and structured and have a good sense of detail
- Your oral and written English is very good
- You are experienced working with the Office package
- You are a quick learner and can work independently

At our European headquarter in Herlev the work atmosphere is casual, and our organizational structure is flat. We have a good staff canteen focusing on health and variety. We have social joint events and several staff clubs.

Click [here](#) and read more about us. You can also find a more detailed PDF about the job, the department, future colleagues, the company, and the products.

If you are interested in this student job, please send your application to jobs@bkmedical.com with a brief description of yourself and your CV in English. Please mark your application "Student worker".

We prefer applications before 20 June 2022.

Interviews for the position will be held on an ongoing basis

If you have any specific job-related questions, you are welcome to send an e-mail in English to Manager of Clinical & Product Training, Benedikte Krøll, bkroll@bkmedical.com.

We look forward to hearing from you.

BK Products Guides Procedures for the Surgeon

“By working within these specialties, I realized that I could provide or improve the health care system that way.”

- Rikke von Barm, Specification Engineer

“I chose to pursue a career in the medtech industry because I want to work at a place where both the company and the colleges always strives for achieving better.”

- Rasmus H. Rossen,
Senior Mechanical Engineer

BK Medical

● Global Organization

BK Medical is an international company with sales offices all over the world, and European headquarters in Herlev, Copenhagen.

At BK Medical, we support employees in developing their skills and expertise. We have a professional and informal organization with flexible working conditions and a flat organizational structure. We are effective and can execute our ideas into strong products – these ingredients make BK Medical an exciting and development-oriented workplace.

We look forward to welcoming you to a team that makes a difference – a difference to quality of life.

● Intraoperative Ultrasound

BK Medical is committed to designing ultrasound systems that help surgeons image, guide, intervene, and navigate inside the human body. Surgeons are our customers, and they range from HPB surgeons, neurosurgeons, and robotic-assisted surgeons to urologists, colorectal surgeons, and more.

Our mission at BK is to enable real-time intraoperative guidance during surgical procedures, giving surgeons the information needed to immediately make critical decisions. Our products are designed and customized for surgical procedures to help surgeons save time and get results.

Now, BK Medical is advancing its mission with GE Healthcare. Together, we will reach more customers and continue to empower surgeons to make critical decisions that allow for better care, faster procedures, and reduced complications.

As market leaders, we work closely with experts and universities to provide the best solutions to clinical challenges.

● Research and Development

BK Medical has development departments in Denmark and the US. The largest development team is based in Denmark. We develop software, hardware, mechanics, signal processing, and advanced algorithms.

When it comes to research, we have collaborated with the Technical University of Denmark (DTU) for more than 20 years. Together, we have completed 2 high technology projects for advanced ultrasound imaging.

We are currently part of a large-scale project with DTU, Danish hospital Rigshospitalet, and the University of Copenhagen concerning extreme high-resolution ultrasound.
